

**Sunday is a day off  
or it's not Sunday!**

The day off on Sunday, and the 8 hour labour day constitute the most important achievements in the history of the Labour Movement on a global scale. A day of relaxation, of social meeting, of free of choice action, a day of celebration. This is what Sunday is!

Yet, one of the prerequisites of the 4<sup>th</sup> depth agreement of Greece is the “optional” opening of shops for 32 Sundays per year in the so called “tourist” areas.

No matter what justification is given by the Greek government, unemployment has not been decreased with the “shopping” Sundays. Employers are obliged to work more and poorly paid. Equally, shops’ profits have not been increased. Simply because their potential clients do not have lack of time, but of money.

For all the above mentioned,

**We call you to stand in solidarity with our struggle.  
Do not visit shops on a Sunday!**
